

Material Safety Data Sheet Lithium Primary Cells and Batteries (LM Series)

Section I - Information of Manufacturer

Manufacturer's Name: DYNAMIS Batterien GmbH Address: Brühlstr. 15 D-78465 Dettingen / Konstanz

Tel. +49 7533 93669-0

Section II - Harzardous Information

Hazardous Components:

Description: CAS# wt-%
1. Lithium 7439-93-2 content see below
2. Manganese dioxide 1313-13-9 10-40 %
3. Organic Electrolyte 4-20 %

Lithium Content per Cell

Product	Capacity in [mAh]	Content of met. Lithium in [g]
	. ,	101

Cells w/ content < 1 g per cell:

LM 14250	650	0.20
LM 14250 HC	950	0.28
LM 14505	1600	0.53
LM 17335	1500	0.50
LM 17335 HC	2000	0.60
LM 17450	2300	0.80
LM 9V	1300	0.93
LM 123A	1500	0.50

Section III - Physical / Chemical Characteristics

Boiling Point: N/A

Vapour Pressure (mm Hg): N/A Vapour Density (AIR=1): N/A Solubility in Water: N/A

Appearance and Odour: Cylindrical Shape, Odourless

Specific Gravity (H2O=1): N/A

Melting Point: N/A

Evaporation Rate (Butyl Acetate): N/A

Section IV - Hazard Classification

Classification: N/A

Batterier

Section V - Reactivity Data

Stability: Stable Status Conditions to Avoid: Fire

Incompatibility (Materials to Avoid): Acids Hazardous Decomposition of Byproducts: N/A Hazardous Polymerization: Will not occur

Section VI - Health Hazard Data

Routes of Entry Inhalation: N/A Skin: N/A Ingestion: N/A

Health Hazard (Acute and Chronic) / Toxiclogical information:

In case of electrolyte leakage, skin will be itchy when contaminated with electrolyte.

In contact with electrolyte can cause severe irritation and chemical burns.

Inhalation of electrolyte vapours may cause irritation of the upper respiratory tract and

lungs.

SectionVII - First Aid Measures

First Aid Procedures:

If electrolyte leakage occurs and makes contact with skin, wash with plenty of water immediately. If electrolyte comes into contact with eyes, wash with copious amounts of water for fifteen (15) minutes, and contact a physician.

If electrolyte vapours are inhaled, provide fresh air and seek medical attention if respiratory irritation develops. Ventilate the contaminated area.

Section VIII - Fire and Explosion Hazard Data

Flash Point (Method Used): N/A

Ignition Temp.: N/A Flammable Limits: N/A

LEL: N/A UEL: N/A

Extinguishing Media: Carbon Dioxide, Dry Chemical or Foam extinguishers

Special Fire Fighting Procedures: N/A Unusual Fire and Explosion Hazards:

Do not dispose of battery in fire – may explode. Do not short – circuit battery – may cause burns.

Section IX - Accidental Release or Spillage

Steps to Be Taken in Case Material is Released or Spilled:

Batteries that are leakage should be handled with rubber gloves.

Avoid direct contact with electrolyte.

Wear protective clothing and a positive pressure Self – Contained Breathing Apparatus (SCBA).

Section X - Handling and Storage

Safe handling and storage advice:

Batteries should be handled and stored carefully to avoid short circuits.

Do not store in disorderly fashion, or allow metal objects to be mixed with stored batteries.

Never disassemble a battery.

Do not breathe cell vapours or touch internal material with bare hands.

Keep batteries between 15°C and 35°C for prolong storage.

Section XI - Exposure Controls / Person Protection

Respiratory Protection (Specify Type): N/A

Ventilation

Local Exhausts: N/A

Special: N/A

Mechanical (General): N/A

Special: N/A Other: N/A

Eye Protection: N/A Protective Gloves: N/A

Other Protective Clothing or Equipment: N/A

Work / Hygienic Practices: N/A

Section XII - Ecological Information

N/A

Section XIII - Disposal Method

Dispose of batteries according to government regulations.

Section XIV – Transportation Information

- a. During the transportation of a large amount of batteries by ship, trailer or railway, do not leave them in the places of high temperatures and do not allow them to be exposed to condensation.
- b. During the transportation do not allow packages to be fallen down or damaged.
- c. Lithium metal batteries identified by manufacturer as being defective for safety reasons, or that have been damaged, that have the potential of producing a dangerous evolution of heat, fire or short circuit are forbidden for transport (e.g. those being returned to the manufacturer for safety reasons).
- d. Except when installed in equipment, for air shipment that contain one or more cells or batteries, they
 are necessary to meet the following items.
 Recommendations on the transport of dangerous goods IATA Special Provision A154, A164 and
 IMDG Special Provision 188. 2024 IATA Dangerous Goods Regulations 65th edition Packing

Instruction 968 Section is applied.

Section XV - Regulatory Information

Special requirement be according to the local regulatories.

Section XVI - Other Information

The data in this Material Safety Data Sheet relates only to specific material designated

herein.

Section XVII - Measures for fire extinction

In case of fire, it is permissible to use any class of extinguishing medium on these batteries or their packing material. Cool exterior of batteries if exposed to fire to prevent rupture. Fire fighters should wear self-contained breathing apparatus.
